
HIGH STRUNG CHRISTMAS LIGHTS

PRODUCT GUIDE

Decisions, decisions...

There are a few things to consider when picking out your lights. Here's some helpful categories and images to help you break-down the options.

LED vs. Incandescent

Clear Incandescent on the left; Warm-white LED on the right

Incandescent lights are classic. They have a warm glow and are inexpensive to purchase, however they average a 3-year lifespan and eat up a lot of electricity. Logistics for powering these lights may require more than one powersource.

LED, on the other hand, last longer (up to ten years). They use less energy, are brighter, and have a variety of color-temperatures to choose from (warm-white, cool-white, pure- white, etc.).

C7 vs C9

Faceted LED vs. Smooth Filament

Standard LED Christmas Lights are faceted. This helps diffuse the LED light and give off a more even glow.

Recently, the **Smooth-Filament LED** was perfected by Holiday Bright Lights Inc. The result was a more classic glow like a true incandescent lamp--they look similar to an Edison bulb you might find on an outdoor cafe light.

Faceted LED

Smooth Filament

Color Temperature

Not all LED lights are the same.

Light-color is measured in Kelvins--the warmth of the glow.

The three options we provide are **sun-warm-white**, **warm-white**, and **pure white**.

Pure White

Warm White

Sun Warm White

Rooflines

We suggest to **target the primary peaks and gutters that outline the front of your home.**

Other options to consider are the saddle and ridges of the roof. Adding saddles and ridges creates more dimension to the roof.

Gables and Gutters Only

Gables and Gutters Only

Saddle Included with Gables and Gutters

Saddle and Ridges with Gables and Gutters

Windows, Garage Trim, and Fascia Boards Can Also Be Wrapped with Lights

Additional Color Patterns

All lights are hand-built and made-to-order. We'll build any color pattern you choose.

Trees & Yard Displays

Do you have a favorite tree?

We use **commercial-grade mini-lights** to wrap limbs. Sometimes a trunk or shrub might call for netlights.

Warm White LED Minilights

Red LED Minilight

Trunk and Limbs Wrapped with Netlights

Purple LED Minilights

Multicolored Minilights

Greenery: Wreaths & Garland

Wreaths come in multiple sizes.

You can get them prelit and wired into the house Christmas lights. We'll even make you custom bows.

Garland is available as fake (reusable); or real garland used in outdoor living displays looks elegant and gives off a festive cedar scent.
